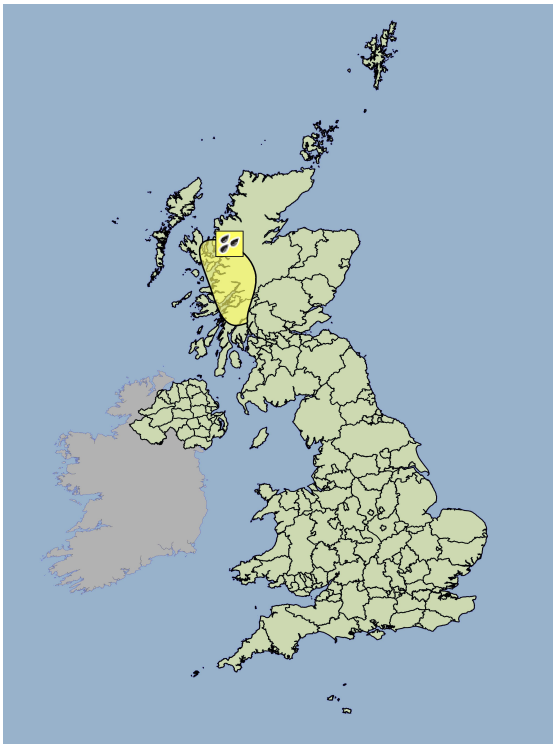
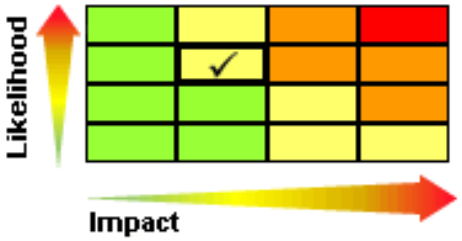
National Severe Weather Warning Service





Chief Forecasters Assessment
A slow-moving frontal system within a moist southwesterly flow will bring further heavy and persistent rain across the west of Scotland. Further rainfall totals of 35 to 50 mm are expected within the yellow area with localised 65 mm likely over the high ground. Adding this to what has already fallen will give some spot totals of 100 mm or more by the end of Monday morning. Some localised flooding of low lying land and roads is expected.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **13:00 on Sun, 08th Dec 2013** until **09:00 on Mon, 09th Dec 2013**

Further outbreaks of rain will occur for the rest of Sunday and persist into Monday morning across much of western Scotland. It will be heaviest and most persistent across parts of western Highland along with Argyll and Bute. The rain should begin to ease later on Monday morning.

The public should be aware of the potential for localised flooding,
